

CHOOZE

FOOT SIZING CHART

We want your choose shoes to make you & your feet very happy. To help you select the best size, print out this page & follow the tips below. You will want to select the size just above your largest toe. Use the measurements on the left for shoes & the measurements on the right for sandals.

Printing tip: Use print settings for "100%", scaling set to "none" & un-check "fit to page" - if printed correctly, the quarter should be actual size and the ruler should accurately measure 5"

If you have any questions email us at customerservice@choozeshoes.com

Be sure to measure in bare feet!

It is best to measure on a hard surface like tile or hardwood floors.

Measure the right and left foot. Use the larger to select the best size.

Fold paper upward along this line and place heel snug against the fold.
